

Roll	Topic	Unit
1	Spark Streaming	Spark
2	RDD Transformations and Programming with RDD	Spark
3	CAP theorem	NoSQL
4	MapReduce Types and Formats	MapReduce
5	Map Reduce architecture	MapReduce
6	HDFS architecture	HDFS
7	GraphX in Spark	Spark
8	HBase Overview and Architecture	HBASE
9	RDD Transformations and Programming with RDD	Spark
10	Introduction to Hive: Shell, Services, Metastore	Hive
11	Introduction to Big Data and Characteristics	Unit 1
12	Spark SQL	Spark
13	DataFlow with HDFS (Read write operations with HDFS)	HDFS
14	MLlib (Machine Learning Library in Spark)	Spark
15	Anatomy of mapreduce, Shuffle and Sort in MapReduce	MapReduce
16	Hadoop Daemons and High Availability	Hadoop
17	Types of NoSQL Databases and CAP Theorem	NoSQL
18	Introduction to Hive: Shell, Services, Metastore	Hive
19	RDD Transformations and Programming with RDD	Spark
20	HBase architecture	NoSQL and HBASE

21	MapReduce Execution Overview	MapReduce
22	Hadoop Ecosystem	Hadoop
23	Hadoop configuration modes	Hadoop
24	Distributed execution overview of Mapreduce	MapReduce
25	HDFS architecture	Hadoop
26	Pig Latin and Data Processing Operators	Pig
27	Distributed execution overview of Mapreduce	MapReduce
28	Core component of Hadoop Ecosystem	Hadoop
29	GraphX in Spark	Spark
30	Tools and Technologies in Big Data	Unit 1
31	Anatomy of a MapReduce job run, Failures, Shuffle and sort, Task execution	MapReduce
32	Need of NoSQL and Types of NoSQL Databases,	NoSQL
33	RDD Transformations and Programming with RDD	Spark
34	CAP theorem	NOSQL
35	MapReduce: Distributed Execution Overview	MapReduce
36	MLlib (Machine Learning Library in Spark)	Spark
